NIEPA FACULTY

National Institute of Educational Planning and Administration (NIEPA)
(Deemed to be University)

ABOUT THE UNIVERSITY

The National Institute of Educational Planning and Administration (NIEPA) (deemed to be university) is a premier national institution, working as a think tank in the field of educational policy and planning in India, for over half a century. The NIEPA offers research and study programmes at the doctoral & masters' level, and organises capacity development programmes for educational planners and administrators in India and abroad. It extends policy support to decision making bodies at the federal and state level in India. The NIEPA is an autonomous body funded by the Ministry of Education (MoE), Government of India.

In its nearly six decades of existence, the NIEPA has witnessed several phases of transformation. The NIEPA's origins can be traced back to 1962, when it was established as the UNESCO Regional Centre for Training of Educational Planners and Administrators for the Asian region. In 1965, it was renamed the Asian Institute of Educational Planning and Administration. It became the National Staff College for Educational Planners and Administrators in 1973, and was further renamed as 'NIEPA' in 1979 when research was added as a major focus of its activities.

It became a university in 2006 under the new name – National University of Educational Planning and Administration (NUEPA), offering research study

programmes and awarding MPhil and doctoral degrees. In 2017, it was renamed as the 'NIEPA' (deemed to be University).

The transformation of NIEPA from there initial beginnings to a university reflects the changing orientation and growing stature of the institution. While it remained a regional institution with support from international organisations in its first decade of existence, it became a national institution, and later a national university funded by the government of India. It was established as a training institute with the core mandate to train educational administrators in the region and in the country. Research was added as another major function of the institute when it became NIEPA, and teaching became one of its core function when it became a university in 2006. Presently, NIEPA is a unique university with a broader mandate in research, teaching and capacity development, and plays a lead role in policy, planning and management of education in India. In recognition of its academic and institutional excellence, the NAAC has recently awarded an "A" Grade to the university with a CGPA score of 3.05.

NIEPA FACULTY PROFILE

Professor Shashikala Wanjari is the Vice-Chancellor of the National Institute of Educational Planning and Administration (NIEPA), New Delhi.
